

Dear patient,

we like to welcome you and your partner to our Center for Reproductive Medicine. Our clinic does mainly focus on treatments for couples with involuntary childlessness. You may find some generally information for a successful treatment hereafter.

According to the individual situation and kind of infertility, different methods apply to a successful treatment.

Such methods are

- intrauterine insemination (IUI)
- in vitro fertilization (IVF)
- microinjection of sperm (ICSI)
- cryopreservation of fertilized eggs
- cryopreservation of sperm + TESE
- combinations of the above methods
- donor sperm insemination

In the following kindly find a list of approximate fees for a single treatment:

■ one cycle intrauterine insemination (IUI) without medication	Euro	300.-
■ in addition preparation of sperm (IUI)	Euro	170.-
■ one cycle in vitro fertilization (IVF) without medication*	Euro	2.425.-
■ in addition preparation of sperm (IFV)	Euro	176.-
■ one cycle ICSI (intraytoplasmatic sperm injection) * according to the number of eggs but max.	Euro	2.312.-
■ cryopreservation of fertilized eggs*	Euro	402.-
■ cryopreservation of sperm*	Euro	450.-
■ cryopreservation of TESE (testicular sperm extraction)*	Euro	295.-
■ preparation of TESE for ICSI	Euro	290.-
■ storage of cryopreserved eggs and sperm for 6 months	Euro	90.-

*) detailed information in your language and list of fees (in German) are available.
